Forecast For West Midlands
Issued by Met Office Exeter
at 0400 on Wednesday 13 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rain, occasionally heavy, with some dry patches, especially southwest.

Today:
A band of rain, occasionally heavy, moves northeast through the region. Should begin clearing by mid-afternoon, with most seeing dry but cloudy conditions towards sunset. A cold day in the northeast but mild in the south and west. Maximum temperature 11 deg C (52 deg F).

Tonight:
The evening will start dry for most, but more rain, often heavy, will come from the north, lasting the night. The southwest likely to miss the worst of it. Minimum temperature 2 deg C (36 deg F).

Thursday:
A mild start in the southwest but soon turning cold. Rain continues for much of the day, perhaps turning to sleet and wet snow for a time. Dry by evening. Maximum temperature 10 deg C (50 deg F).

Outlook for Friday to Sunday:
Friday dry but often cloudy. A band of rain, often heavy, moving from the west late Saturday morning, clearing by night. Sunday dry and mostly clear.
